- 2024 ● **Studera**
Django python junior **backend developer** ([May 2024 - Sep 2024](#))
<https://studera.ru>
Development and maintenance of the website's backend, ensuring smooth **API** functionality and implementing new features.
- 2024 ● **Air Liquide**
intern Data scientist ([Jun 2024 - Sep 2024](#))
Working with **databases**, updating the forecasting system to a new format due to the exit of companies from Russia, parsing data, and gathering news.
- 2024 ● **MyLomonosov**
Junior+ **backend developer** ([Sep 2024 - Nov 2024](#))
Development and maintenance of the website's backend (using **Django, PostgreSQL, Redis**)

PROJECTS

- **Project on Data Analytics and Visualization of Car Prices**
([Nov 2023 - Dec 2023](#))
- **Automated Restaurant Booking System**
([Jun 2024 - present](#))
Development of a revolutionary restaurant reservation system utilizing custom-built neural networks for natural language processing and automated phone calls.
- **Neural Network Project**
([Aug 2024 - present](#))
Development of a revolutionary AI-powered platform that generates fully functional web applications, games, backends, and frontends from a single prompt.
- **Poker website**
([Mar 2024 - Apr 2024](#))
Development of the backend using Flask for a website for booking poker games.
- **Other projects**
([Sen 2023 - present](#))
Conducted **parsing** and created a variety of **bots**, such as a song generator, a product review collector and etc., alongside developing a personal **budget manager website** and **marketplace** for iPhones.

SKILLS

Personal

Team leader
Well organized
Hard worker
Ego to learn
Positive communicator

Technical

Strong knowledge in math, IT
Python (numpy, matplotlib, pandas, streamlit, seaborn, plotly, aiogram, telebot, flask, jupyter, FastApi, **Django, DRF**, etc);
SQL (MySQL, SQLite, **PostgreSQL**)
C++ (Grpc, Qt, etc)
Language: fluent english
Others: Microsoft applications, Power BI, VBA
